

Dear Hiring Team,

I am writing to apply for the Senior Software Developer (Android – Kotlin Multiplatform / Compose Multiplatform) position at Alior Bank. With 9 years of Android engineering experience, I have consistently built B2C applications around Clean Architecture and MVVM, most notably architecting a Clean Architecture solution from scratch for a real-time trading application at Halyk Bank. My recent work at Zalando and Slice centers on Jetpack Compose, where I accelerated development speed by 80% by migrating legacy views to a modular Compose-based component design. I bring strong TDD discipline, having achieved close to 100% test coverage using MockK and Espresso at Arlo, and I have supported team growth directly, from leading a team of 5 to conducting over 50 technical interviews and mentoring developers through the Belarus Kotlin User Group. I would welcome the opportunity to bring this architecture and testing expertise to the Alior Mobile and Alior Kids applications.

Best regards,

Maksim Sukhotski
