

Dear Hiring Team at B3 Consulting Poland,

I am writing to apply for the Senior Android Developer position. With 9 years of Android experience, I have architected systems from scratch — including designing a modular Clean Architecture for a real-time trading application at Halyk Bank — and consistently apply SOLID principles and MVVM/MVI patterns to keep large codebases maintainable. I have led the migration of legacy XML view hierarchies to Jetpack Compose at Slice, accelerating development speed by 80%, and driven TDD practices to near-100% test coverage on critical features at Arlo and Turkcell. Beyond individual delivery, I have mentored developers and conducted 50+ technical interviews as a Technical Lead at Vention, and regularly lead code reviews and pair programming in distributed teams at Zalando. I would welcome the opportunity to bring this architectural and mentoring experience to your new digital innovation hub in Poland.

Best regards,

Maksim Sukhotski
