

Dear Hiring Team,

I am writing to express my interest in the Android Developer (Kotlin Multiplatform) role at Sii Polska. With 9 years of experience as a Senior Android Engineer, I have built high-scale B2C applications using Clean Architecture, MVVM/MVI, Jetpack Compose, and Kotlin Coroutines/Flow, most recently at Zalando and Slice. At Halyk Bank, I architected a modular Clean Architecture from scratch for a real-time trading application and led a team of five, and at Arlo I built real-time hardware-to-app communication with a strong TDD discipline (MockK, Espresso, ~100% coverage on critical features). I have also worked closely with cross-functional and distributed teams to deliver consistent, high-quality solutions, and have mentored developers and conducted 50+ technical interviews. I believe my architecture-first mindset, testing rigor, and Compose expertise translate well to your banking application project. I would welcome the opportunity to discuss how I can contribute to your team.

Best regards,

Maksim Sukhotski
