

Dear Hiring Team,

I'm excited to apply for the Senior Android Developer role on your fully remote, long-term project. With 9 years of Android experience, including building high-traffic B2C applications at Zalando, Slice, and Arlo, I bring hands-on expertise in Kotlin, Java, MVVM, Clean Architecture, and SOLID principles directly relevant to your platform's scale and requirements. At Halyk Bank I architected a modular Clean Architecture system from scratch and led a team of 5, cutting delivery bottlenecks by 90% through custom CI/CD workflows, while at Slice I improved development speed by 80% by migrating legacy views to Jetpack Compose. I'm accustomed to working in agile, cross-functional teams alongside product, design, and backend, with a strong focus on code quality through rigorous code review, TDD, and XP practices. I'd welcome the opportunity to bring this experience to your team and contribute to scaling your mobile application for millions of users.

Best regards,

Maksim Sukhotski
