

Dear Allegro Hiring Team,

I'm writing to apply for the Senior Mobile Software Engineer (Android) role in the Post-Purchase Domain. With 9 years of Android experience, including deep work with Jetpack Compose, Kotlin Coroutines and Flow, and Clean Architecture, I've consistently delivered high-scale B2C features — from migrating Slice's legacy views to Compose (accelerating development speed by 80%) to architecting real-time hardware-to-app communication at Arlo. At Halyk Bank I built a modular Clean Architecture from scratch for a real-time trading application and led a team of 5, and at Vention I conducted over 50 Android technical interviews, which has sharpened my eye for code review and mentoring junior engineers. I'm drawn to Allegro's scale and its collaborative mobile community of 100+ developers, and I'd welcome the chance to contribute to fast, scalable solutions in the Post-Purchase domain. Thank you for considering my application.

Best regards,

Maksim Sukhotski
