

Maksim Sukhotski

Senior Android Engineer | B2C & IoT Specialist

[GitHub](#) | [LinkedIn](#) | [Email](#) | [Telegram](#) | English: C1 (Fluent)

Senior Android Engineer with **9 years** of experience building high-scale **B2C applications** and **Smart Device/IoT** integrations, including real-time hardware-to-app communication and reusable, modular libraries. Expert in **Kotlin Flow, Coroutines, and Jetpack Compose**, with deep experience **architecting systems and Clean Architecture from scratch**, driving **XP/TDD** practices (MockK, Espresso), and building CI/CD pipelines for automated builds, versioning, and delivery. Experienced in technical mentorship, documentation, and supporting other developers across distributed teams.

Core Tech Stack:

- **Languages/Frameworks:** Kotlin, Java, Jetpack Compose, Android SDK, Coroutines, **Kotlin Flow**.
- **Architecture & Principles:** **Clean Architecture**, MVVM, MVI, **SOLID**, Multi-threading, Modularization.
- **Tools & Testing:** **BLE (Bluetooth Low Energy)**, Dagger/Hilt, Retrofit, TDD (MockK, Espresso), CI/CD (GitHub Actions, Jenkins).

PROFESSIONAL EXPERIENCE

Arlo · Feb 2020 – Jun 2022

- Architected **real-time hardware-to-app communication** for Camera UX 3.0 migration.
- Managed **Smart Device integration** and security features (Emergency Button, Locations, Logging) using **Coroutines and Flow**.
- Achieved **~100% code coverage** for critical camera features using **TDD (MockK, Espresso)**.
- Introduced automated quality gates and static code analysis to the engineering culture.

Halyk Bank · Feb 2019 – Feb 2020

- **Architected from scratch** a scalable, modular **Clean Architecture** for a real-time trading application.
- Led a team of 5 in an Agile environment, reducing delivery bottlenecks by **90%** via custom CI/CD workflows (detekt, codecov).
- Optimized deployment speed by **25%** through automated versioning and build delivery scripts.

Turkcell · Sep 2017 – Feb 2019

- Migrated **50% of Java codebase to Kotlin**, ensuring absolute stability through **100% TDD** coverage.
- Identified and resolved critical memory leaks and performance bottlenecks in a high-traffic cloud storage B2C app.

Zalando · Oct 2024 – March 2026

- Engineered high-traffic B2C features for Notification Centre and Product Details using **Jetpack Compose** and **Reactive Programming**.
- Utilized **Extreme Programming (XP)** and pair programming to maintain high-fidelity code in a complex, multi-team environment.
- Aligned performance metrics and data consistency across cross-functional distributed teams.

Slice · Jun 2022 – Aug 2024

- Led delivery of **complex B2C UI/UX** features: Live Order Tracking and ADA Compliance.
 - Optimized purchase conversion to **50%** through data-driven UI refinements and analytics.
 - Accelerated development speed by **80%** by migrating legacy views to **Jetpack Compose** and a modular component design.
-

COMMUNITY & LEADERSHIP

Vention · 2021 – 2024

- **Technical Lead (Hiring):** Conducted **50+ Android technical interviews**; designed roadmaps for junior/mid-level developer career growth.

Mentorship & Speaking · 2019

- **Belarus Kotlin User Group:** Co-organized events for 100+ attendees; mentored 5 developers in delivering e-commerce projects.
 - **ITStep Academy:** Invited Speaker; delivered workshops on Android Architecture and career progression.
-

EDUCATION

MSc in Computer Science

Belarusian National Technical University (2020)

BSc in Information Systems and Technologies

Belarusian National Technical University (2018)

Yandex Mobile Development School

Graduate Certificate (2017) | Focused on high-performance mobile architectures and UI optimization.
